PROFILE

Software Engineer with 1+ years of experience in full stack development and backend engineering. Experienced in building web applications and REST APIs using React.js Node.js Express.js MongoDB and PostgreSQL. Comfortable working with authentication databases API integration and modern frontend development. Looking for Software Engineer role where I can contribute to real world products and continue growing as a software engineer.

EDUCATION

Bachelor of Science in Software Engineering, GC University Faisalabad 2021 - 2025
Specialization: Software Development - CGPA: 3.06/4.00

- **Relevant Coursework:** Data Structures and Algorithms, Database Systems, Software Design and Architecture, Operating Systems, Distributed Systems, Object Oriented Programming, Analysis of Algorithms.

Higher Secondary School (ICS - Computer Science), Graduate College Faisalabad. 2019 - 2021
Percentage: 87%

Secondary School Certificate (Computer Science), Govt. City Muslim Higher Secondary School. 2017 - 2019
Percentage: 91%

SKILLS

Programming:	JavaScript ES6+, TypeScript, Python, SQL, HTML5, CSS3
Frontend:	React.js, Next.js, Tailwind CSS, Bootstrap, Redux Toolkit, shadcn/ui
Backend:	Node.js, Express.js, RESTful APIs, WebSocket, Firebase
AI and Generative AI	LLM Integration, OpenAI API, RAG, AI Chatbot Development, LangChain, Vector Databases
Databases	MongoDB, PostgreSQL, MySQL
Tools and Platforms:	Git, GitHub, Docker, Postman, Figma, Hugging Face Spaces
Languages:	English (Fluent), Urdu (Native)

PROFESSIONAL EXPERIENCE

Backend Developer March 2025 – Present
Relnov | Premium Software Development & Digital Agency *Faisalabad, PK*

- Developed and maintained REST APIs using Node.js and Express.js for database driven web applications.
- Worked with MongoDB and PostgreSQL to design and manage data structures and backend operations.
- Implemented authentication using JWT and sessions with role based access control.

Implemented authentication using JWT and sessions with role based access control.

Freelance Full Stack Developer March 2024 – Present
Self Employed *Remote*

- Developed web applications and business solutions using React.js Node.js Express.js and databases.
- Worked with clients to understand requirements implement features integrate APIs and deliver complete solutions.

Full Stack Development Intern August 2026 – October 2026
Auspify Technologies *Remote*

- Contributed to full stack development tasks involving modern web technologies and application development workflows.
- Worked on practical development tasks technical research documentation and problem solving across frontend backend APIs and databases.

Generative AI Application Development January 2026 – February 2026
Higher Education Commission & National Computing Education Accreditation Council *Remote*

- Completed an intensive certification in Generative AI with practical work involving OpenAI APIs Hugging Face and Retrieval Augmented Generation.
- Developed AI applications and participated in a 48 hours Generative AI Hackathon where I contributed to an AI Study Companion project.

MERN Stack Trainee / Intern August 2023 – June 2024
Softwiz Solutions and Institute *Faisalabad, PK*

- Completed hands on training in full stack development using MongoDB Express.js React.js and Node.js while building real world applications.

ACADEMIC AND PRACTICE PROJECTS

MediCore | Healthcare Management Platform *[Link]*
Tech: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Clerk

- Developed a full stack healthcare platform for managing patients doctors departments and appointments through role based workflows.
- Designed the system to address fragmented healthcare management by providing a centralized platform for coordinating administrative and patient related operations.

HireFlow | Recruitment Management Platform *[Link]*
Tech: React.js, Node.js, Express.js, MongoDB, Redux Toolkit, JWT, Cloudinary

- Developed a recruitment platform connecting candidates recruiters and companies through job management and application workflows.
- Addressed the challenges of manual recruitment processes by providing centralized job search applications resume management and candidate tracking.

AgentX | Agentic AI Meeting Assistant *[Link]*
Tech: Next.js, Node.js, Express.js, PostgreSQL, Mastra, Descope, MCP

- Developed an Agentic AI assistant that enables users to manage Google Calendar meetings through natural language with streaming responses and persistent conversations.
- Addressed the complexity of meeting management by combining AI agents external tools authentication memory and MCP into a unified productivity platform.

BookFlow | SaaS Appointment Booking Platform *[Link]*
Tech: React.js, Node.js, Express.js, MongoDB, Stripe, Google Calendar

- Built a SaaS platform for business bookings payments and scheduling.
- Addressed manual scheduling and booking challenges by providing automated appointment management payment processing and integrated calendar workflows.

LEADERSHIP & ACTIVITIES

- **Lead Instructor | iCodeGuru:** Delivered Generative AI development sessions and guided learners through practical AI projects and modern development workflows.
- **Team Lead | Relnov:** Led development tasks and coordinated technical work across frontend backend and API integration within software projects.
